QUESTION 3

What should we be aiming and aspiring to achieve and why?

Please write your comments here:

As well as the stated aims and aspirations, the new Local Plan should seek to protect and enhance the ANOB so that it remains available to future generations and is protected as a tourist asset. The Borough currently seems to put the NPPF as its main objective, disregarding the high status that the NPPF itself puts on the AONB.

QUESTION 6d

If No, what infrastructure issues do you think are missing?

Please write your comments here:

Management of health and social care services need to be given a more specific priority, particularly given the ageing population.

Improvements to fibre optic broadband and mobile coverage should be central to any development planning.

Rail connections to London have not been addressed, particularly given the substantial increase in development along the London to Ashford and south east coastline.

Please continue on a separate sheet if necessary

HOUSING

QUESTION 6e

Have we identified the main housing issues facing the borough?

No

QUESTION 6f

If No, what housing issues do you think are missing?

Please write your comments here:

The location of future development has not been sufficiently addressed in terms of where it is both needed and wanted. Nor has the question of the density of housing been addressed by the planners in any imaginative or original way to make best use of land in the urban areas where development is most needed.

TRANSPORT AND PARKING

QUESTION 6i

Have we identified the main transport and parking issues facing the borough?

Yes subject to the following

QUESTION 6j

If No, what transport and parking issues do you think are missing?

Please write your comments here:

The railway issues have been insufficiently dealt with, we refer to this link:

<http://www.kent.gov.uk/about-the-council/strategies-and-policies/transport-and-highways-policies/rail-action-plan-for-kent/kcc-response-to-the-public-consultation-on-the-new-south-eastern-rail-franchise-serf>

There are also substantial concerns about parking at the local railway stations and consideration should be given to decking. Parking within town centres could be addressed with the inclusion of park and ride in suitable locations. Perhaps consideration could be given to a tram service or similar as a solution to capacity. Consideration should be given to policing to address parking on pavements.

SUSTAINABILITY

QUESTION 6m

Having regard to the prepared Sustainability Appraisal Scoping Report, have we identified the main sustainability issues facing the borough?

No

QUESTION 6n

If No, what sustainability issues do you think are missing?

Please write your comments here:

In the same way that the AONB is a significant constraint to development, resources like water are similarly constraining.

We would support recycling in the east of the borough and to including in the waste contract the retention of the civic amenity vehicle service. In addition, the borough should investigate the use of single stream technology for recycling rather than the piecemeal approach that currently exists.

SETTLEMENT GROUPINGS

QUESTION 8

Do you agree with the suggested groupings of settlements?

No

QUESTION 8a

If No, what changes do you suggest to the groupings of settlements and why?

Please write your comments here:

The methodology is flawed to the extent that residents do not recognise the description of the villages as presented and that the presumption that any villages are capable of sustaining everyday life that seems to underpin this methodology is fanciful.
